WARNING Messages on LCD

Display	Problem	Solution
WARNING! **Clock Source:** **No Word Signal**	No word clock is fed into the **WORD IN** or the incoming word clock frequency is not correct.	Feed the correct word clock.
WARNING! **Clock Source:** **No Video Signal**	No video signal or frame pulse is fed into the **VIDEO IN** or the incoming clock is not correct.	Feed a correct video signal or frame pulse.
WARNING! **No clock from MASTER** **Check connections** **and settings**	No connection to the master **DTRS** machine. The master unit is turned off. Different **Fs** is selected on the master **DTRS** machine.	Connect **PW-88S** cable. Turn on the master machine. Set the correct **Fs**.

WARNING!
Clock Source:
  Video frame mode
  doesn't match..
	The **Tc Frame Mode** setting is different from the incoming video signal frame.	Correct the **Tc Frame Mode**.
		(see menu group 5)

WARNING!
 	
Clock Source:
  Video PLL unlockl
	Incoming signal video signal / frame pulse frequency or level is out of range.	Check the signal or termination.
		(see **VIDEO IN/THRU**
		        specifications)

WARNING! **Cannot Resolve** **No Video Signal**	No video signal or frame pulse is fed into the **VIDEO IN**.	Feed a correct video signal or frame pulse. Or turn off the **Video Resolve**. (see menu group 5)

WARNING!
Cannot Resolve
  Video frame mode
  doesn't match..
	The **Tc Frame Mode** setting is different from the incoming video signal frame.	Correct the **Tc Frame Mode**.
		(see menu group 5)

WARNING! **Broken tape:** **Replace the tape**	The tape is broken.	Replace the tape.
WARNING! **TDIF(dubbing)cable** **not connected**	**TDIF-1** (dubbing) cable is not connected. This message appears when **DIGTAL IN** is turned on.	Connect **PW-88D** or **PW-88DL** cable to the **TDIF-1(DIGTAL I/O)** connector. Or turn off the **DIGTAL IN**.
WARNING! **Condensation on drum**	Condensation occurred on the head drum.	Leave the unit switched on for one or two hours, then cycle the power before using.

Display	Problem	Solution
WARNING! **Servo error ##** **Cycle the power**	Servo error **##** occurred. (## : see below)	Cycle the power and replace the tape. If a "**Servo error**" persists, contact **TASCAM** representaives.

## = 11	Unable to shift mechanism mode within the five seconds of command reception.
## = 21	Tape is not wound into cassette half even **Eject** is commanded.
## = 31	Occurrence of tape slack during tape runs.
## = 41	Unable to latch solenoid on **FF/REW** winding.
## = 02	The drum motor could not work correctly in time.
## = 04	The capstan motor could not work correctly in time.
## = 08,59,68	The reel motor could not work correctly in time.

Display	Problem	Solution
WARNING! **Cannot Chase** **Master frame mode** **doesn't match.**	The **Tc Frame Mode** setting is different from the incoming video signal frame when the **CHASE** is turned on.	Correct the **Tc Frame Mode**. (see menu group 5)
WARNING! **TC Record Source:** **Not Synchronized**	The incoming Timecode does not synchronize to the **DA-98** system clock. The message appears when **TC REC** is on with the **External TC** selected as **TC Record Source**.	Feed and record a correct timecode. Or select **INTERNAL** clock for **CHASE** if using the recorded unsynchronized timecode.
WARNING! **Cannot Chase** **No Tape TC**	No timecode is recorded on the tape.	Change the **Tape TC Mode** from **Tc Track** to **ABS**. (see menu group 5)
WARNING! **Cannot Chase** **No Master TC**	No master timecode is fed or the incoming timecode may have some drop.	Feed a correct timecode. Or try chaging the **Error Bypass** value to **30 Frame**. (see menu group 4)
WARNING! **Cannot Resolve** **No Tape TC**	No timecode is recorded on the tape.	Change the **Tape TC Mode** from **Tc Track** to **ABS**. (see menu group 5)
WARNING! **Cannot Record TC:** **No Timecode from** **Selected Source**	No timecode is fed when **External TC** recording. No timecode on the tape when **Assembly Timecode** recording.	Feed a correct timecode. Start **Assembly Recordig** at where timecode exists.
WARNING! **Sys ROM is too old.** **Please use Ver #.##** **or later**	**Sys ROM** version does not match with the **Sync ROM** version.	Contact **TASCAM** representaives.

WARNING Messages on LCD (continued)

Display	Problem	Solution
WARNING! **Sync ROM is too old.** **Please use Ver #.##** **or later**	**Sync ROM** version does not match with the **Sys ROM** version.	Contact **TASCAM** representaives.

Error Messages on 7-seg LED

Display	Problem	Solution
e. hI -8t.	No - **Hi8** tape is inserted.	Use **Hi8** tapes.
e. tHI n.t	Thin tape (e.g. **180 - minute**) is inserted.	Use **120-minute** or shorter tapes.

Other Messages on 7-seg LED

Display	Meaning
--l oad--	Loading the tape.
-unl oad-	Ejecting the tape.
bot	At the beginning of the tape.
eot	At the end of the tape.
no tape	No tape is inserted.
no abs- t	"MEMO" key is pressed at unformatted area of the tape.
